Profile Summary

Highly motivated Python Developer with strong knowledge of Python programming and OOPS concepts. Skilled in developing, testing, and maintaining Python-based applications with clean and efficient code. Experienced in working with MySQL/SQL databases, writing queries, and supporting backend operations. Familiar with Django, REST APIs, and HTML/CSS for web development. Strong problem-solving skills, good communication, and a willingness to learn new technologies in a collaborative environment.

Internship Experience

Backend Developer(Python, MySQL), Besant Technologies

Aug 2024 – Jul 2025

Roles and Responsibilities :

- Developed and maintained backend application logic using Python, implementing REST APIs, handling server-side processing, and ensuring smooth integration between frontend and database components.
- Designed and optimized SQL databases, including writing complex queries, joins, stored procedures, and ensuring data integrity, performance, and accuracy across backend services.
- Collaborated in debugging, testing, and improving backend functionality, resolving performance issues, enhancing features, and following best practices in coding standards, documentation, and version control (Git).

Skills

Languages : Python, Javascript, (ES6+), HTML5, CSS3, MySQL.

Front-end : ReactJS(Hooks, Router), Tailwind CSS, Bootstrap, DOM Manipulation, JSX

Backend/ Frameworks: Django(Basic proficiency), RESTful API Development.

Databases: MySQL, Schema Design, Joins, Stored Procedures & Functions, Triggers & Events.

Version Control/ Tools: Git, GitHub, VS code, Pycharm, MySQL Workbench, Netlify

Projects

FINANCE TRACKER AND EXPENSE ANALYTICS SYSTEM [MySQL, Python] [Link](#)

- Designed and implemented a comprehensive Finance Tracker database system to manage users, multiple financial accounts, categorised income and expenses, and monthly budgets.
- The system supports real-world financial operations such as transaction tracking, budget monitoring, balance validation, and financial reporting with strong data integrity and performance optimization.

FITNESS TRACKING SYSTEM [MySQL] [Link](#)

- Created a system that lets users track workouts, diet, and overall fitness progress using meaningful data reports.
- Handled backend logic and database operations, ensuring accurate data storage, validation, and fitness progress tracking.

FOOD CART WEBSITE [ReactJS] [Link](#)

- Built a responsive food ordering interface with real-time search and filter functionality
- Designed a dynamic cart system that updates totals instantly with over 99% accuracy, ensuring a seamless shopping experience.

Certifications

Front-end Developer Certification, Vebbox Software Solutions

Feb 2024 – Jul 2024

- Gained hands-on experience by building 8+ mini projects and creating responsive web interfaces using HTML, CSS, JavaScript, ReactJS, and Bootstrap.

Educational Qualifications

BSC- Mathematics with Computer Applications

2020-2023

SASTRA Deemed University (CGPA - 6.15)

HSC

2019-2020

Sri Ramakrishna Matric Higher Secondary School (PERCENTAGE - 63.83)

SSLC

2017-2018

Sri Ragavendra Matric Higher Secondary School (PERCENTAGE - 76.6)
