

EZHILKUMARAN R

Python Full Stack Developer

ezhilkumaran0903@gmail.com | 8838959101 | Chennai, India | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Results-driven Python Full Stack Developer with 1 year of hands-on backend experience delivering scalable REST APIs, Django/FastAPI applications, and optimized MySQL databases. Built and shipped an AI-powered Behavior Analytics System and an NLP-based ATS Resume Scorer with measurable performance outcomes. Proficient in ReactJS for responsive frontend development.

KEY SKILLS

Languages & Frameworks: Python (OOP, Async) • Django • FastAPI • JavaScript (ES6+) • ReactJS (Hooks, Router)

Database & Backend: MySQL • Schema Design • Complex Joins • Stored Procedures • Triggers • REST API Design

Frontend & Styling: HTML5 • CSS3 • Tailwind CSS • Bootstrap • DOM Manipulation • Responsive Design

AI / Data: NLP • Machine Learning Integration • Behavioral Analytics • Keyword Extraction

Tools & DevOps: Git • GitHub • Postman • Render • Netlify • VS Code • PyCharm • MySQL Workbench

INTERNSHIP EXPERIENCE

Backend Developer — Python & MySQL | Besant Technologies, Chennai | Aug 2024 – Jul 2025

- Engineered and deployed 10+ production REST APIs using Python (Django/FastAPI), cutting average response time by 30% via query optimization and server-side caching.
- Designed normalized MySQL schemas with complex multi-table joins, stored procedures, and triggers — boosting high-volume data retrieval speed by 40%.
- Maintained Git-based version control workflows across all projects, achieving 100% code traceability and zero-regression releases over 11 months.
- Diagnosed and resolved 20+ critical backend defects, reducing production error rates by 25% and improving system uptime across all environments.
- Collaborated in sprint-based Agile cycles, writing clean Python code following PEP 8 conventions and best practices.

PROJECTS

Human Behavior Analytics System Python | Django | MySQL | ReactJS | Machine Learning

- Architected an end-to-end AI platform processing 10,000+ user interaction logs to detect behavioral trends and predict actions using ML classification models.
- Built 8 REST API endpoints integrated with a real-time ReactJS dashboard, reducing analytics query latency by 35% through indexing and efficient pagination.
- Optimized MySQL schema for large-scale behavioral data, achieving 50% faster aggregated report reads and improved data integrity across modules.

ATS Resume Scorer & Analyzer Python | FastAPI | NLP | spaCy | Keyword Extraction | REST API

- Developed an NLP pipeline using keyword extraction and semantic job-description matching, increasing candidate shortlisting accuracy by 45%.
- Deployed real-time scoring API handling 500+ resumes with actionable feedback, improving average ATS pass rates by 30% for end users.
- Designed a scalable FastAPI backend with modular NLP components, enabling extensible scoring logic and seamless frontend API integration.

Food Cart E-Commerce Platform ReactJS | Tailwind CSS | JavaScript ES6+ | REST API Integration

- Engineered a fully responsive e-commerce interface with real-time product search, dynamic cart management, and instant price calculation— achieving sub-200ms UI interactions.
- Optimized React component lifecycle using Hooks and memoization techniques, improving Lighthouse performance score to 92/100 acrossmobile and desktop.

EDUCATION

B.Sc Mathematics with Computer Applications

SASTRA Deemed University | CGPA: 6.15 | 2020 – 2023

CERTIFICATIONS

Front-End Developer Certification

Vebbox Software Solutions | Feb – Jul 2024
